

Jeff Douville

Director, Materials Planning & Logistics A123 Systems, LLC.

Jeff joined A123 Systems from BAE Systems in October 2015. Jeff is responsible for planning and executing key activities involving the acquisition, management and transportation of manufacturing and maintenance, repair and operations (MRO) materials for A123's U.S. manufacturing plants. Specific areas of responsibility include production master scheduling, direct and MRO materials planning-buying, inventory policy and management, lead-time and shipping lane analysis, 3PL coordination and performance management, hazardous materials import-export compliance, and global materials and logistics integration.

Before joining A123 Systems, Jeff was Director of Logistics & Supply Chain programs and Senior Logistics & Supply Chain Business Development Manager at BAE Systems, a leading multinational defense OEM and services provider. Prior to BAE Systems, Jeff enjoyed a 25 year career in the U.S. Army as a logistician and supply chain manager.

Jeff has extensive experience in strategic planning, supply chain management, and global relations. He's applied his managerial expertise in supply chain design, global distribution, inventory control, materials management and budget/resource planning in North America, Central/Eastern Europe, the Caucasus Region, Africa, the Middle East and Northeast Asia. He has a passion for driving efficiency, increasing productivity, and maximizing performance in complex, high pressure environments.

Jeff is an APICS Certified Supply Chain Professional (CSCP) and earned Master's degrees in Business Administration (Supply Chain Management) and Operations Research from Penn State University; and Strategic Studies from the U.S. Army War College. He earned his Bachelor's degree in Business Administration (Labor Relations) from the University of Wisconsin-Milwaukee. Jeff is also a graduate of the U.S. Army War College, U.S. Air War College and U.S. Army Command and General Staff College.
